

After Cooler 400P/E

Reliable dry & clean air.

Cold Jet®

Portable diesel compressors are a necessity to run your blasting operation, but they often supply hot and moist air, which can alter the integrity of your ice and hamper the performance of your blasting system. The Cold Jet After Cooler 400 will change all that by removing up to 80% of moisture from the ambient air. It will cool the compressed air, which can reach temperatures of 180° - 200°F (82.2° - 93.3° C), to within 5° of the ambient temperature. The After Cooler enables the operator the ability to control the moisture in their blasting environment, allowing them to blast in virtually all temperatures and humidity levels, making their business more versatile and more effecient.

(BASED ON 80 - 125 PSIG WITH A MAX PRESSURE DROP OF LESS THAN 3 PSIG)

SYSTEM FEATURES

- Includes a water separator and a 20 micron particulate filter.
- Heavy duty wheels for easy maneuvering and portability.
- Designed for use with 185 diesel air compressor.
- Reduced ice consumption rates and reduced operating costs
- Prevents ice condensation and bridging.

SIZE (HxWxL)
40" x 20.75" x 33.5"
(102 cm x53 cm x 85 cm)

WEIGHT
146 lbs (66kg)

MAX PRESSURE
250 psi (17.2 bar)

MAX AIR TEMP
350°F (176°C)

WATER SEPERATOR
40 micron element

PNEUMATIC LUBRICATOR OIL RESERVOIR
8oz (235 ml)
